

PHYSICI 70: Introduction to Digital Fabrication

You are cordially invited to the end of semester open house for
PS70: Introduction to Digital Fabrication:

Thursday May 12th, 3:30-6pm
Science Center (1 Oxford St) Room 102

Students will be showcasing their work from the semester, including skills like molding and casting, sensor fabrication, CNC machining, microcontroller programming and 3D printing. Their individual final projects synthesize the skills they have learned; examples include wearable electronics, remote sensing and data logging devices, interactive sound objects, and much more!

Please join us for an open house with light refreshments and informal presentations.
